Sharp Electronics of Canada Launches New Versatile Microwave Lineup Featuring Air Fryer and Flatbed Tech

MISSISSAUGA, ON: March 4, 2026: Sharp Electronics of Canada Ltd. (SECL) today expanded its kitchen portfolio with three new microwave models designed to solve the most common frustrations of Canadian cooks: limited counter space, uneven heating, and the clutter of multiple appliances.

High-Performance Solutions for Modern Kitchens

- **The 3-in-1 Air Fryer (SMC0985KSC):** A powerful 0.9 cu. ft. all-in-one that replaces your air fryer, convection oven, and microwave—without taking over your countertop. Purpose-built for apartments and condos, this compact unit features multi-stage cooking that combine up to three functions—defrosting, cooking, and crisping—into a single seamless operation, delivering full-size performance in spaces where every inch counts.
- **The Flatbed Innovator (SMC1174KSC):** Canada's first flatbed residential countertop, this 1.1 cu. ft. model removes the traditional turntable. The flatbed design creates a 13" x 13" cooking surface, allowing users to fit large rectangular dishes that would otherwise get stuck in a standard microwave.
- **The Over-the-Range (OTR) Workhorse (SMO1961KSC):** A spacious 1.9 cu. ft., 30-inch powerhouse featuring Sensor Cook, a smooth-gliding Carousel[®] turntable, and a robust 3-speed, 400 CFM exhaust fan. It eliminates guesswork by automatically adjusting power levels based on your food's moisture—delivering consistently delicious results with ease.

Direct from Leadership

"Our goal with this launch is simple: give Canadians more functionality without taking up more space," says **David Servos, Senior Director, Smart Life Business Group, Sharp Electronics of Canada Ltd.** "Whether it's the flatbed design that fits larger meals or the 3-in-1 model that

replaces three separate appliances, we're focusing on practical tech that actually makes a difference in a busy kitchen."
