

NEWT End-to-End Solution

The NEWT end-to-end managed solution is geared to make our system work seamlessly.

NEWT is the business services brand of Fibernetics Corporation. A Competitive Local Exchange Carrier (CLEC), Fibernetics has established one of the largest networks of any CLEC, with the vision of being the only "One Company - One Solution" in Canada. NEWT utilizes this national infrastructure to deliver a full range of voice and data services to business clients across the country.

The NEWT development team has created a voice platform that provides the most sought after features in an end-to-end, Wide Area Network (WAN) managed PBX solution. Running on the private Fibernetics CLEC network, the NEWT Managed PBX provides a more stable and secure foundation to carry, manage and transfer calls.

NEWT provides extensive and ongoing training for customers ensuring all employees are thoroughly versed in each and every feature that the NEWT Managed PBX, NEWT ANA™, or other NEWT products has to offer. The NEWT team creates the most positive and seamless installation possible, without compromising business flow.

NEWT is the manufacturer, the phone company, the internet company, the installation company and the service company, all in one end-to-end solution.

Fully Managed - Fully Supported: The End-to-End Solution

Calculated Design - Alan Brown (President)

"NEWT Managed PBX created an easy set up and professional installation experience for my company and team. Because we were able to pay for the system outright, it took away the additional monthly burden of having to pay fees for phone sets and pay per use features. Including the long distance, that has shown a consistent trend in savings. In addition it encompassed a total solution for shared costs, allowing us to run multiple companies off of one system. The phone system is simple yet highly functional. The training provided to our team was professional yet personal to each of the business needs between companies. It created great ease for staff to adapt to the change over."

The end-to-end solution that the NEWT Managed PBX provides is the most dependable, lowest risk business voice solution in the market today.

“ The end-to-end solution the NEWT Managed PBX provides is the most dependable, lowest risk business voice solution in the market today! ”
